Teaching

I have taught a total of 820 hours at undergraduate and graduate levels. I briefly describe each course.

OXFORD UNIVERSITY (2021-)

Guest lectures:

- Credit scoring and the remaking of the post-apartheid city, Department of Urban and Regional Studies, Politecnico di Torino, November 19th 2024.
- "Quantitative methods to study housing inequalities", Cornell Architecture Art and Planning, October 29th 2024.
- "Rental platforms and housing inequalities in South Africa", Department of Geography, University of Washington, October 16th 2024.
- "The Atlas of Finance: mapping money across finance and the environment", W.A. Franke College of Forestry and Conservation, University of Montana, October 10th 2024.
- "Platform capitalism and racial capitalism", Department of Geography, UC Berkeley, October 2nd 2024.
- "Towards a cashless, automated city? Urban governance in the era of the platform economy", MSc in Sustainable Urban Development, University of Oxford, April 28th 2023.

Masterclass: Digital Technologies in the African city

I secured funding and organised in March 2023 a 10-day graduate masterclass in partnership with the Ecole Normale Supérieure and the African Center for Cities. The event brought together 20 selected students from Nigeria, France and South Africa to research how digital technologies transform cities, focusing on Cape Town, one of Africa's major tech hubs. The [program](#) featured guest lectures, collective workshops, site visits, and participant-led research projects. Guest speakers included leading local scholars and representatives from the tech industry.

ECOLE NORMALE SUPÉRIEURE (2017-2021)

Quantification in social sciences: mapping and spatial analysis with R [graduate level]

Class for students enrolled in the MA "Quantitative Social Sciences" at the Department of Sociology. Each session involved a 50-minutes lecture, followed by one-hour lab session.

Introduction to urban studies: key concepts [undergraduate level]

This class introduced 3rd-year students to the main theories in urban sociology and urban geography. Working in pair, students presented and discussed papers, before opening the discussion to the classroom, using questions submitted as prompts by the teacher.

Introduction to fieldwork: city-based research project [undergraduate and graduate level]

Three-day fieldwork organised each year in a different city (Bordeaux, Grenoble, Marseille, Marne-La-Vallée *etc.*) My role involved determining a list of key research topics, reaching out to representatives from local governments and the private sector to prepare site visits, and organising accommodation and transport. Split in small groups, students undertook a research project for the rest of the semester. The final report was uploaded on the department's [website](#).

Advanced fieldwork: researching urban public spaces [graduate level]

Elective course structured on in-depth fieldwork in Nigeria. This 10-day program was organized by the Ecole Normale Supérieure (France), the Universities of Lagos (Nigeria) and the French Institute for Research in Africa (Nigeria). Aside lecturing, I supervised student's fieldwork for their research projects.

Lectures in Human Geography [graduate level]

Lectures for students who prepare the [agrégation](#), the most selective examination for the recruitment of high-school teachers and university lecturers in France.

Tutoring [undergraduate and graduate levels]

I have tutored a total 12 students for the department of Geography. The tutor's role is to provide guidance on students' academic journey and professional projects, and support for their general well-being.

Introduction to statistics and mapping with R [undergraduate level]

I created this course for students with a background in humanities and limited exposure to statistics and mapping. Using R, each session involved a 50-minute lecture, followed by a one-hour lab session. The evaluation involved weekly exercises and a final report based on two datasets and a series of questions.

Introduction to GIS [undergraduate level]

This course introduced students to GIS. Each class involved a 50 minutes lecture and a one-hour lab session on QGIS, with the goal to develop student's autonomy in data collection and visualization for their fieldwork and master thesis.

INSTITUTE OF URBAN PLANNING AND ALPINE GEOGRAPHY, UNIVERSITY GRENOBLE ALPES (2014-2017)

Urban geographies of globalisation [undergraduate level]

Two-hour tutorials based on document analysis and student-led research projects. After two sessions of collective site visits, students chose a research topic and conducting autonomous fieldwork.

Initiatives for local economic development [graduate level]

Through readings, lectures and field trips, students analyzed mainstream policies and alternative initiatives that promote local economic development in the city of Grenoble, featuring guest speakers and case studies from the Circular Economy, Community-Supported Agriculture Networks, or start-up incubators.

Geographic Information Systems [undergraduate level]

Two-hour lab sessions on QGIS for 3rd-year students. The evaluation consisted in weekly assignments and a final exam.
